

TACTICAL MEDICS INTERNATIONAL

THE TMI "TEAM BAG"

FEATURING THE CAMELBAK™ BFM WITH MEDBAK™ INSERT

Tactical Medics International is pleased to offer the medical supplies to fill the CamelBak MedBak and BFM carrier/hydration system. Used by military and civilian tactical operators and medics, these kits contain immediate and life-saving first-aid materials. The MedBak fits into the CamelBak BFM carrier/hydration system. Heat illness and dehydration are the number one cause of non-traumatic death in tactical operations.....and they are entirely preventable. Because this well-designed and well-constructed system offers the advantage of an integrated hydration system, these medical packs are far superior to their predecessors and competitors.

Tactical Medics International custom builds medical packs to any specifications, or agency needs. Training on how to utilize the contents of the kit is also provided by TMI for a reduced fee. Our recommendation for the basic MedBak includes:
